

TeaVita AI (茶知己)

**AI-Powered Personalised Wellness
Through Functional Selenium Tea**

Maker in China 2026 SME IEGC - Hong Kong Chapter
Category: Biomedicine & Health | AI Health Tech

Market Disconnect

The Problem

- 70% of Chinese suffer **sub-health**, with **metabolic diseases** hitting younger demographics rapidly.
- Market Mismatch: Consumers demand personalized, science-backed wellness, but only receive generic products with unmeasurable results.

The Opportunity

- **A \$9 Trillion** global wellness economy is waiting for a precision solution.
- **86%** Consumers Seeking Science-backed Personalized Health

Market Indicator	Data
Global wellness economy (2028)	USD 9 trillion
China health services industry (2030)	RMB 16 trillion
China AI health management (2027)	RMB 2.59 trillion
Consumers improving health (China)	86% (vs 70% global)
Willingness to share health data	77%

45.1%

Total **Flavonoids**

Highest natural concentration in any botanical.

110X

Higher Potency

More potent than Ginkgo Biloba extract.

Se

Rich in **Selenium**

ASEAN Chinese: 22Milliion Ethnic Chinese, selenium-deficient core audience

Selenium:

- ✓ Reduce cardiovascular risk
- ✓ Boost immunity
- ✓ Protect cognition [Lancet, JAMA]

Key Active Ingredient	Core Data Highlight
Total Flavonoids	≥20%, up to 45.1%
Dihydromyricetin (DHM)	>82% of total flavonoids
Amino Acids	17 types (all essential)
Trace Elements	14 types (incl. Se, K, Ca), Naturally selenium

The AI-TCM Diagnostic & Intervention Loop

01 AI Constitution Assessment

 **Scan → Recommend → Track :**
A closed-loop from "blind drinking" to precision wellness

02 Personalized Intervention

 **AI analyses tongue + Face images**
→ **Identify TCM constitution**
→ **Prescribes the exact tea product**

03 Measurable Outcomes

 **30-day health index rise:**
45 → 80+

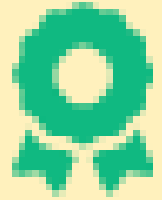

Traditional Chinese Medicine

AI Visual Diagnostics

Strategic Alliance: Ai Da Health (愛大健康)

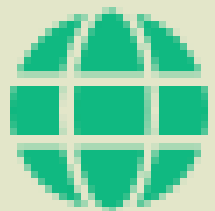

Industry Pioneer

Ai Da Health is China's first TCM vertical-domain AI company with multiple patents.

Strategic Cooperation

Strategic Cooperation Agreement signed 15 June 2026 —
technology + supply chain + health services

Mutual Benefit

TeaVita AI gains a deployable AI stack without building from scratch; Ai Da gains **access to the ASEAN market**.

Business Model

01

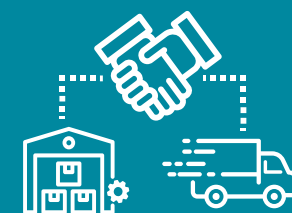

LIGHT-ASSET

5 Enshi suppliers+
1 core OEM for branded products
— **ZERO** manufacturing capex

02

3PL LOGISTICS

~40% cost saving vs owned warehousing
Instant scalability across **HK**
3 ASEAN markets
without capital lock-up

03

DUAL-CHANNEL

B2B

(SPAs/wellness + AI diagnostic package)

B2C

(KOL e-commerce with generous revenue-sharing)

01

Industry proven

- **RMB 2.253B** output
- **102,000 mu** cultivation
- **RMB 255M** international orders

02

Traction

- **Strategic alliance** signed (15 June 2026)
- **Enshi supply chain** secured
- **Shenzhen** entity operational

03

Total addressable

- **26.5 million** ethnic Chinese across
 - **HK +**
 - **Singapore**
 - **Malaysia**
 - **Indonesia**

Market Validations & Traction

Market Entry Traction Update

HK\$20,378.00

Total Cumulative Revenue
(Since June 16 to Aug 15)

HK\$351.00

Average Run-Rate / Day

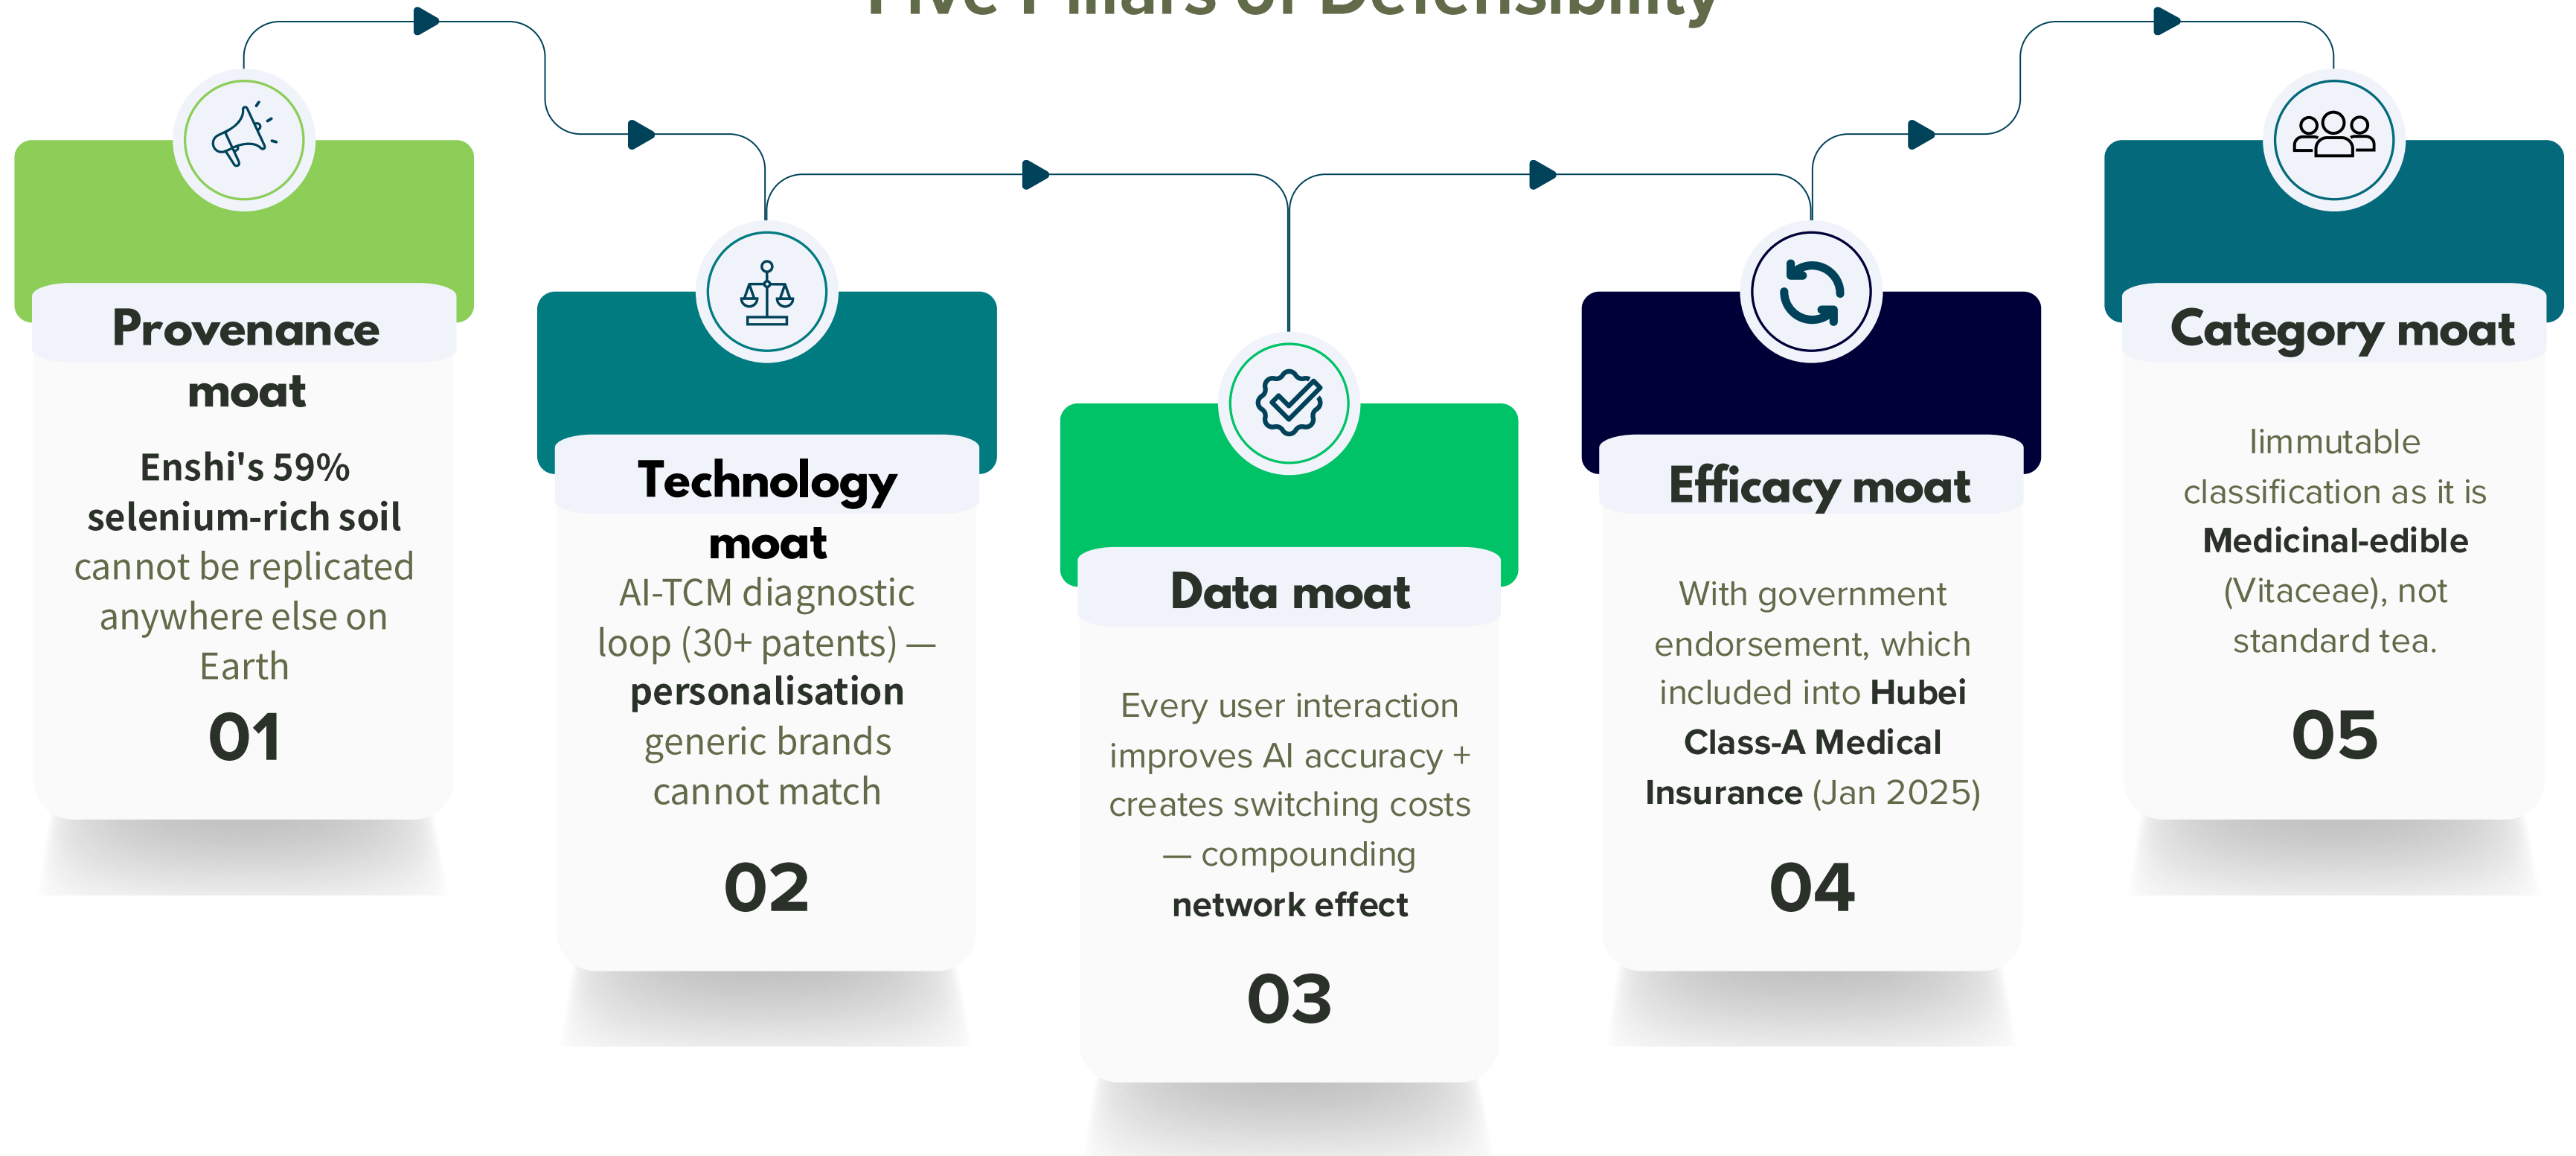

**Strong Validation of
Consumer Demand**

Reliable Daily Velocity:

Achieved an average **Daily Run Rate (DRR)** of **HK\$351**, showing stable daily repeat and organic purchase patterns with the full operation of the website and WeChat **platform**.

Competitive Moat

Five Pillars of Defensibility

Market Entry Strategy & Roadmap

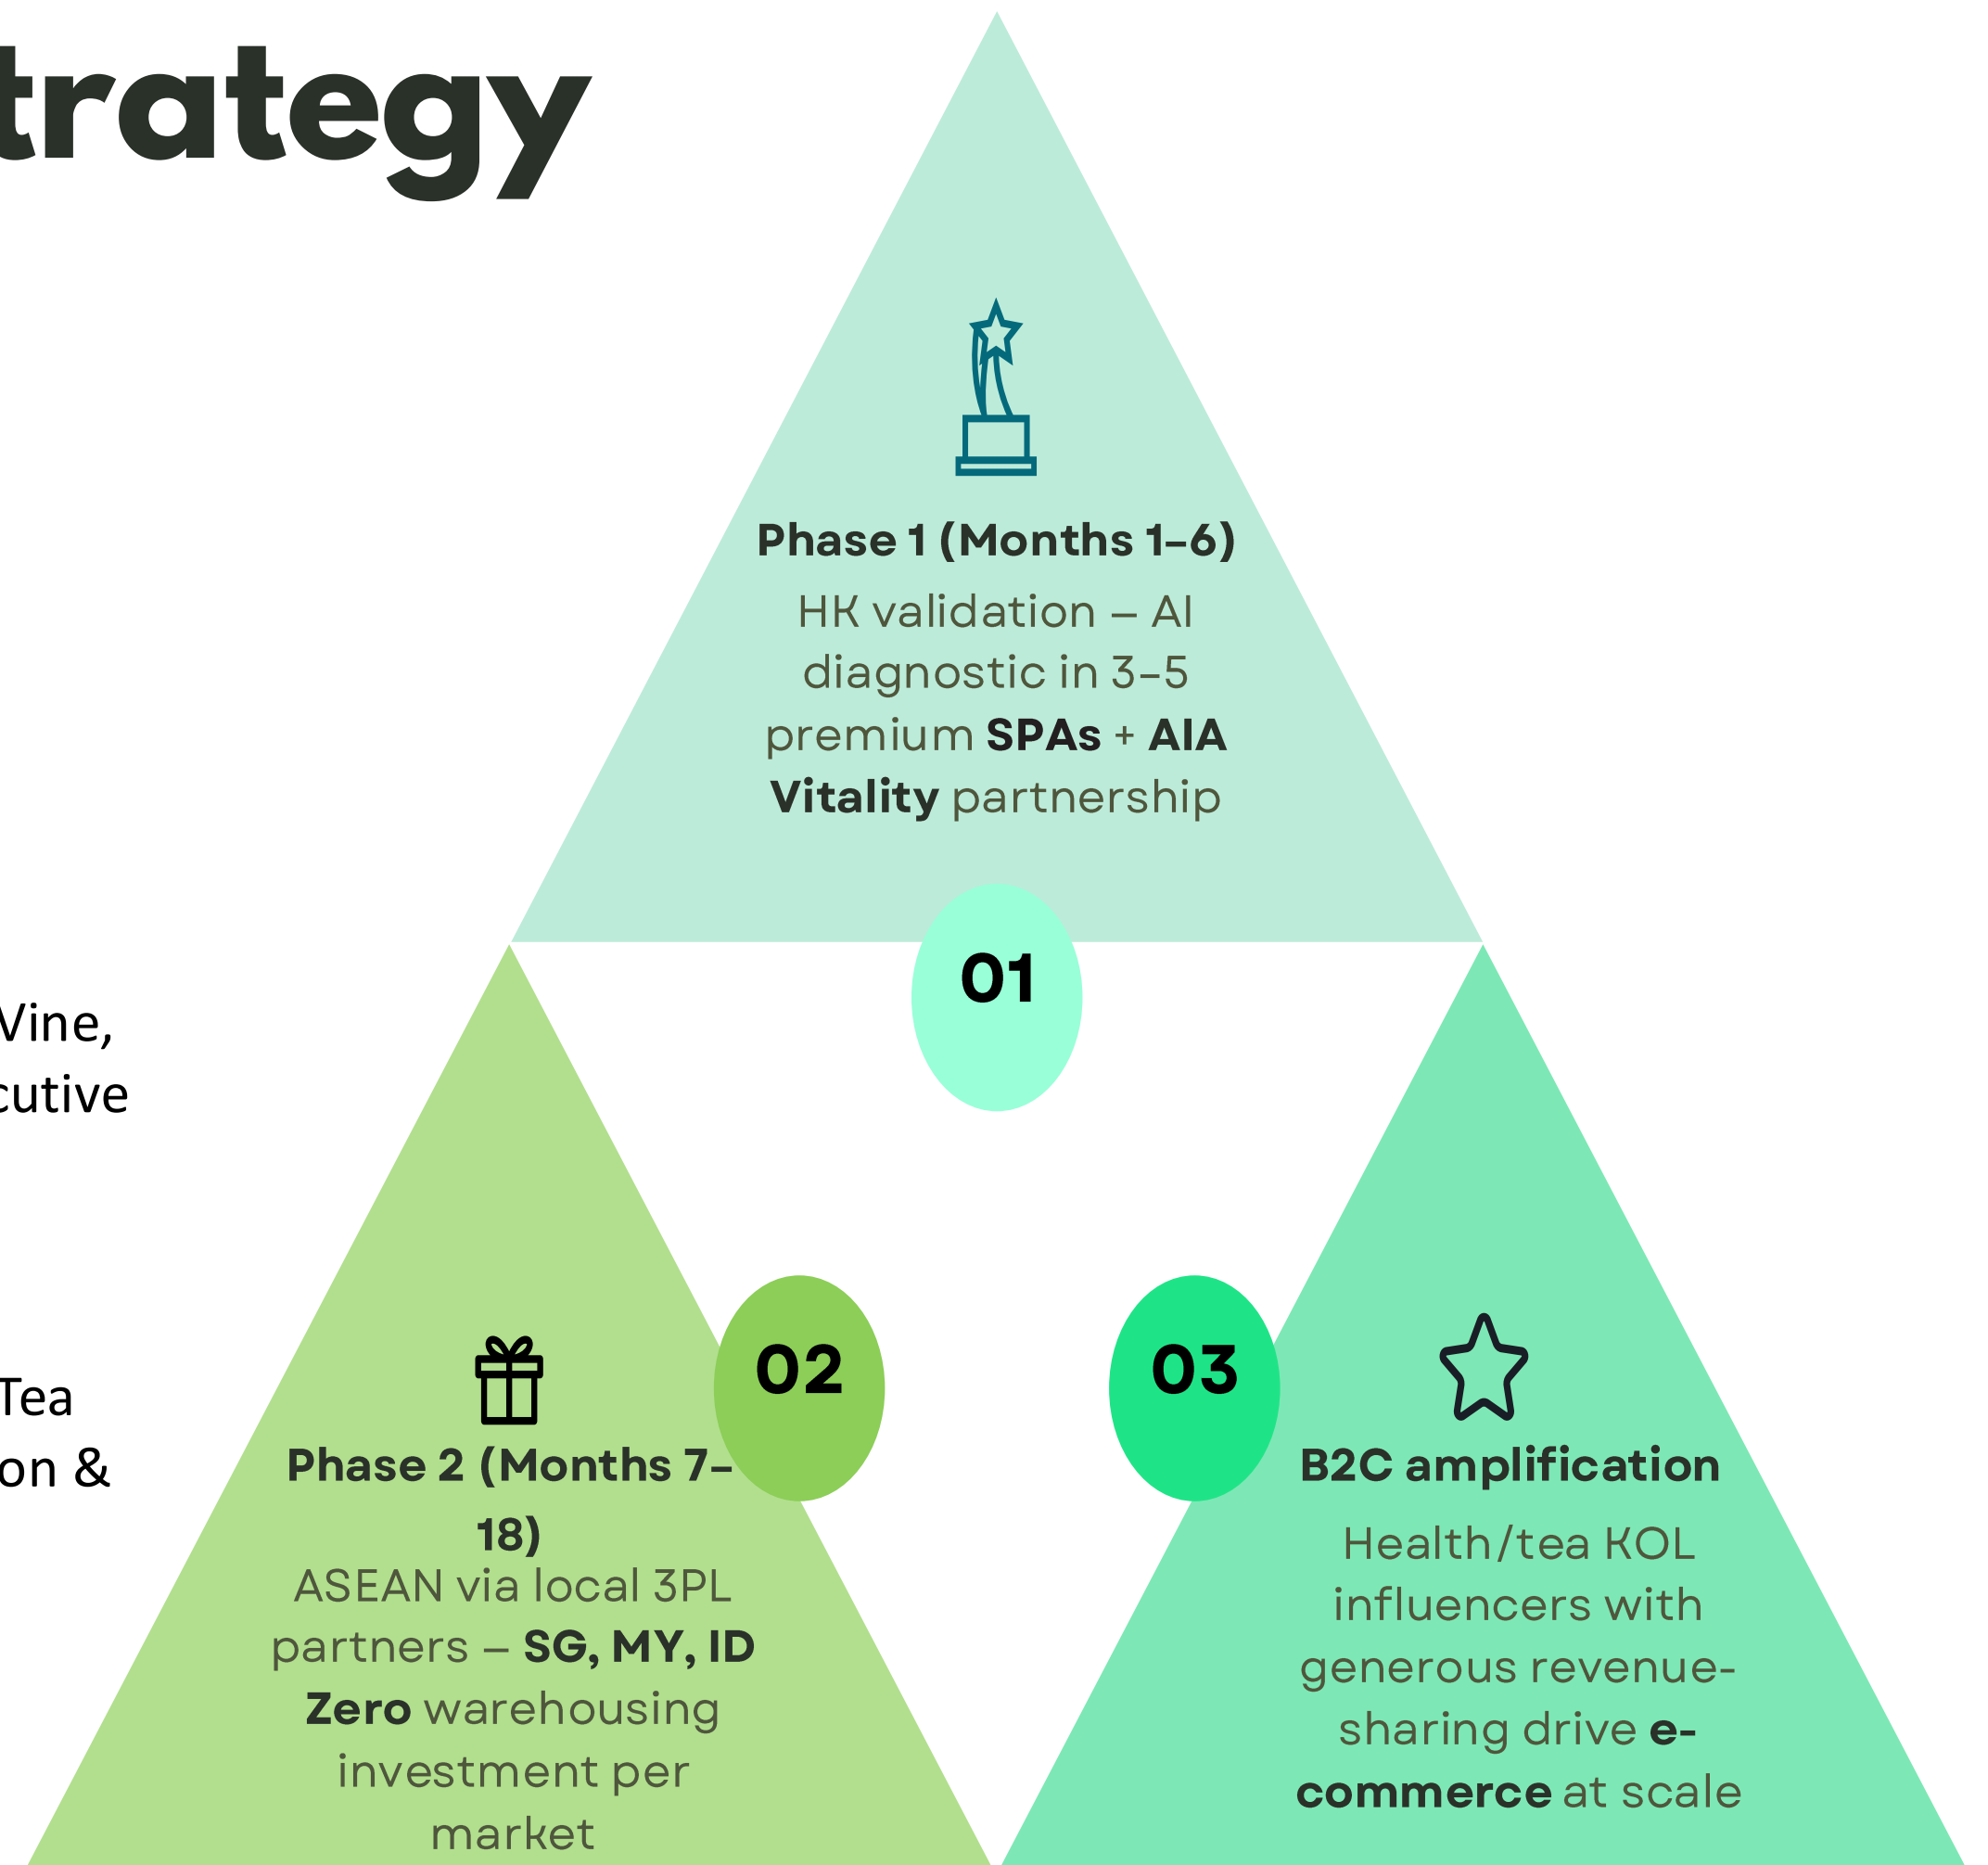

**2 Phase expansion in both
B2B and B2C market**

Phase 1 (Now)

Core SKU Portfolio: launch of 5 Premium SKUs (Enshi Vine, Red, and Green tea tins + bags) alongside custom executive wellness gift box.

Phase 2 (Year 2)

Precision Nutraceuticals: High-margin Selenium Vine Tea Extract tablets featuring continuous AI-TCM prescription & subscription loop.

Financial Projections & Budget

**HKD 800K–
1.2M Sales**

Year 1 Target

- **HK B2B + e-commerce**
- Able to achieve capital-efficient via **3PL + OEM**
- No **fixed** infrastructure

**HKD 10M–
15M Sales**

Year 3 Target

- **Full ASEAN**
- **3PL scalability** without proportional capex increase

**65–75%
Gross Margin**

Operation Cost

- 3PL saves **~40%** vs owned warehousing
- Break-even **faster** due to variable costs

Risk Analysis & Mitigation

01 Regulatory

- AI device is the **Class I health auxiliary** (not medical)
- **FEHD food registration**
- No therapeutic claims

02 Supply chain

- **5** supplier diversification + **1** OEM
- 3PL provides **geographic flexibility** and **exit optionality**

03 Selenium safety

- Formulated within **safe dietary range**
- AI monitors cumulative intake
- Clear **labelling**
